

Econo-Net

Compliance: *Econo-Net* complies to ASTM C 1116-10.

Product Description: *Econo-Net* is a medium duty fibre that offers good bonding, long term durability and improved toughness.

Applications: *Econo-Net* provides an excellent low dose, steel free crack control solution for house slabs, toppings, driveways, footpaths and most general purpose concrete slab on ground applications.

Benefits: *Econo-Net* is designed to provide excellent resistance to plastic and heat shrinkage cracking.

Material Properties:

Material: 100% virgin homopolymer polypropylene

Fibre Count:

Form: Collated fibrillated network fibre

Length: 19mm.
38mm and 51mm on request

Specific Gravity: 0.91

Acid/Alkali Resistance: Excellent

Tensile Strength: 600MPa

Absorption: Nil

Packaging and Storage: *Econo-Net* is packaged in 0.9kg mulchable bags.
20 x 0.9kg bags/box
12 boxes/pallet.

Recommended storage is a dry covered area.

Performance: Dose rate - 0.9kg/m³

Mixing Procedure: Add Fibres with additives. If assistance required click on *Mixing Procedure* or contact ReoCo directly.

Technical Advice: If assistance with design or dose rates is required, please contact a ReoCo Representative.
